# Statistical Analysis of Hydrology in California under Climate Variability

WSWC S2S Workshop, San Diego, June 9<sup>th</sup> 2016

Michael Anderson Michael.L.Anderson@water.ca.gov

Kwabena O. Asante kasante@geiconsultants.com

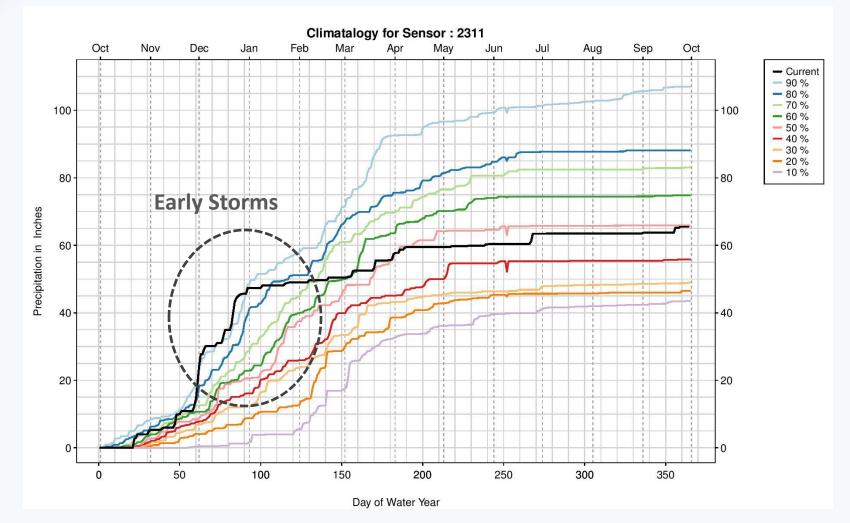

# Outline

- Motivation: Forecasting Challenges
- California Storm Characteristics Database
- Analysis of Storms and Climate Variability
- Integration with CHRS Storm Database
- Other Statistical Climatology Applications

#### Sensor View of Seasonal Precipitation

WY 2013: Very high early season precipitation, only minor events after Jan 1st

#### Migrating to a Storm View of Precipitation

#### Storm End: 02-09-2015 22:00PST 44 42 7 6 40 5 Precipitation (inches) 38 3 38 2 - 1 34 Trace 33 Dry -125 -120 -115

Storm Start: 02-04-2015 10:00PST

#### Storm Detail

Storm ID 2015020410 Average Depth 3.16 inches Long Mass Center -121.886 Length Wet Coast 685 miles Madden Julian Oscillation Weakly Suppressed

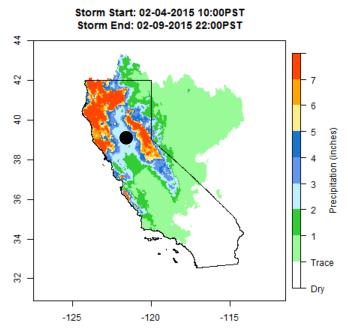

#### Area

73,076,100 acres Long Max Depth -124.150 Long Area Center -120.784 Time Between Storms 222 hours Pacific Decadal Oscillation Positive Start Date 2015-02-04 Max Depth 19.29 inches Lat Mass Center 39.507 Max Storm Elevation 473.0 meters El Nino Southern Oscillation El Nino

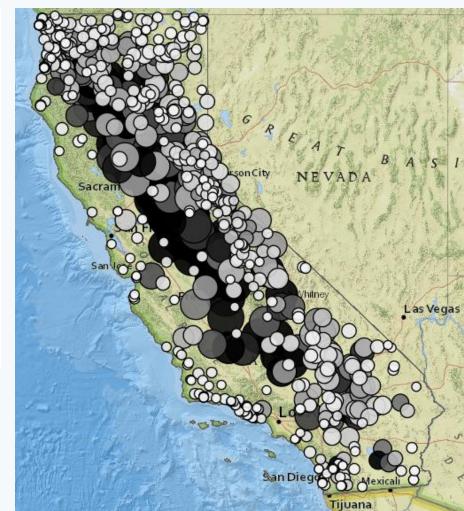

#### Volume

19,260,081 acre-feet Lat Max Depth 40.225 Lat Area Center 38.282 Storm Duration 132 hours Oceanic Nino Index Neutral

### Assembling the Storms Characteristics Database

- Over 700 storms from 2004 to present
- Derived from 6-hourly NOAA CNRFC QPE grids

### Climate Phases from ONI, PDO and MJO Indices

	Definition	Time in Phase (%)
ONI Cold	ONI < -0.5 for at least 5 months	21%
ONI Neutral	Neither Warm nor Cold phase	62%
ONI Warm	ONI > 0.5 for at least 5 months	17%
Negative PDO	5-year moving average PDO < 0	78%
Positive PDO	5-year moving average of PDO > 0	22%
Strongly Suppressed MJO	MJO at 120°W between -3 to -1.5	4%
Weakly Suppressed MJO	MJO at 120°W between -1.5 to 0	41%
Weakly Enhanced MJO	MJO at 120°W between 0 to 1.5	46%
Strongly Enhanced MJO	MJO at 120°W between 1.5 to 3	9%

ONI=Oceanic Nino Index PDO=Pacific Decadal Oscillation MJO=Madden Julian Oscillation

### Statewide Storm Characteristics by ONI Phase

	Cold	Neutral	Warm
Annualized Storm Count	77	92	73
Storm Area (million acres)	6.7	3.8	9.7
Precipitation Volume (thousand acre-feet)	27	14	48
Average Precipitation Depth (in)	0.05	0.04	0.06
Peak Precipitation Depth (in)	0.40	0.28	0.36
Mean Storm Event Date	Jan	Apr	Dec
Calendar Month with Most Storms	Nov	May	Oct
Time Between Storms (hr)	24	24	24
Mean Storm Event Duration (hr)	18	12	18

### Statewide Storm Characteristics by PDO Phase

	Negative	Positive
Annualized Storm Count	90	73
Storm Area (million acres)	4.5	4.5
Precipitation Volume (thousand acre-feet)	18	16
Average Precipitation Depth (in)	0.05	0.05
Peak Precipitation Depth (in)	0.31	0.34
Mean Storm Event Date	Mar	Feb
Calendar Month with Most Storms	Oct	Oct
Time Between Storms (hr)	24	24
Mean Storm Event Duration (hr)	12	12

#### Statewide Storm Characteristics by MJO Phase

	Strongly Suppressed	Weakly Suppressed	Weakly Enhanced	Strongly Enhanced
Annualized Storm Count	89	91	82	90
Storm Area (million acres)	22.0	2.9	4.9	5.0
Precipitation Volume (1000 acre-ft)	250	11	24	15
Average Precipitation Depth (in)	0.14	0.04	0.05	0.04
Peak Precipitation Depth (in)	1.17	0.27	0.34	0.28
Mean Storm Event Date	Mar	Mar	Mar	Jan
Calendar Month with Most Storms	Apr	Feb	Dec	Oct
Time Between Storms (hr)	24	24	24	30
Mean Storm Event Duration (hr)	30	12	12	12

### Analyzing Characteristics by Drainage Region

Drainage Region	Storms (%)	
Central Coast (CC)	40%	
Colorado River (CR)	34%	NORTH COAST SACRAMENTO
North Coast (NC)	74%	RIVER G R E A T
North Lahontan (NL)	55%	CarsonCity NEVADA
Sacramento River (SR)	58%	ERANCISCO BAY JOAQUIN RIVER
San Francisco Bay (SF)	32%	Las
San Joaquin River (SJ)	46%	TULARE LAKE SOUTH LAHONTAN
South Coast (SC)	44%	CENTRAL COAST
South Lahontan (SL)	46%	SOUTH COLORADO RIVER
Tulare Lake (TL)	39%	San Diego Tijuana

### Drainage Region Patterns: Peak Storm Frequency

	СС	CR	NC	NL	SR	SF	SJ	SC	SL	TL	All
ONI Cold (La Niña)	Dec	Feb	Nov	Apr	Apr	Nov	Oct	Nov	Nov	Nov	Nov
ONI Neutral	Mar	Aug	May	May	May	Mar	May	Apr	May	May	May
ONI Warm (El Niño)	Nov	Dec	Oct	Oct	Oct	Nov	Nov	Dec	Nov	Jan	Oct
Negative PDO	Apr	Aug	Oct	May	May	Mar	May	Apr	Mar	May	Oct
Positive PDO	Feb	Feb	Nov	Jan	Jan	Jan	Jan	Feb	Jan	Jan	Oct
Strongly Suppressed MJO	Feb	Apr	Apr	Apr	Apr	Feb	Apr	Apr	Apr	Apr	Apr
Weakly Suppressed MJO	Apr	Aug	Oct	May	May	Feb	Mar	Feb	Aug	Aug	Oct
Weakly Enhanced MJO	Dec	Dec	Nov	Dec							
Strongly Enhanced MJO	Feb	Dec	Oct	Feb	Feb	Nov	Oct	Oct	Oct	Oct	Oct

Peaks Earlier Than Statewide

Peaks Later Than Statewide

#### **UC-Irvine CHRS Connect Storm Database**

### **UC-Irvine CHRS Connect Storm Database**

- **Source**: Extracted from PERSIANN, a satellite-derived precipitation dataset
- Spatial Coverage: global
- **Temporal Coverage**: 2000 to 2015; periodically updated
- Attributes: 55 fields including 15 storm characteristics and 40 weather/climate indices
- Dataset of 673 storms impacting California has been extracted and transferred to DWR

#### **Transitioning Storms to Other Applications**

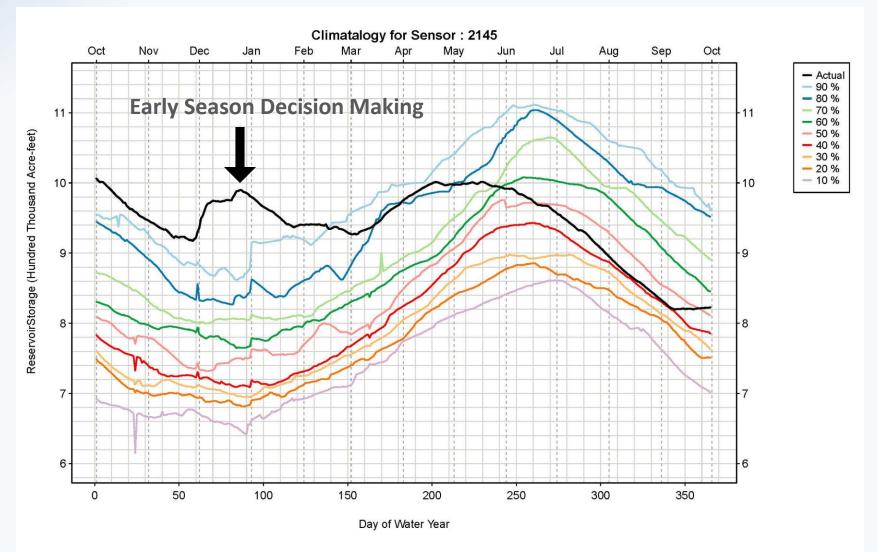

- Can predictable storm characteristics be used to improve precipitation and/or water supply forecasts?
- What else can we use predictable storm characteristics for?

#### **Historical Ensemble Predictions**

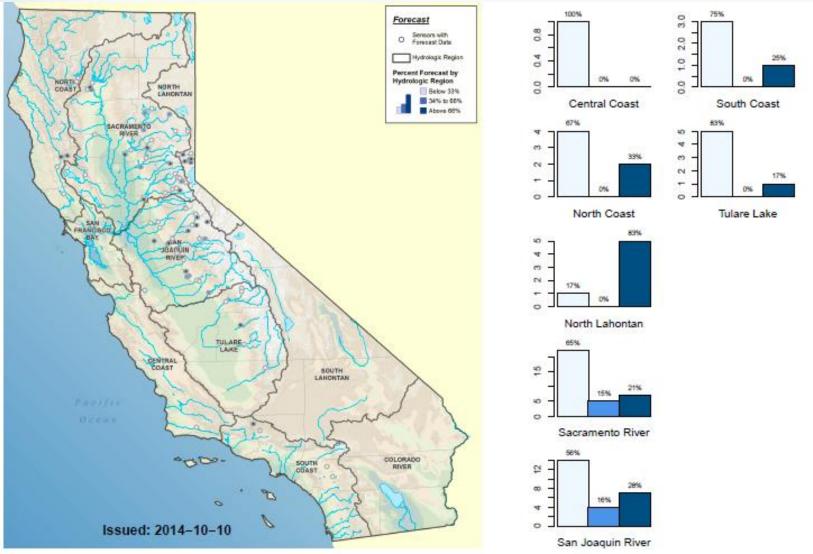

Can S2S forecasts inform subsetting of hydrologic ensembles?

#### **Reservoir Storage Management**

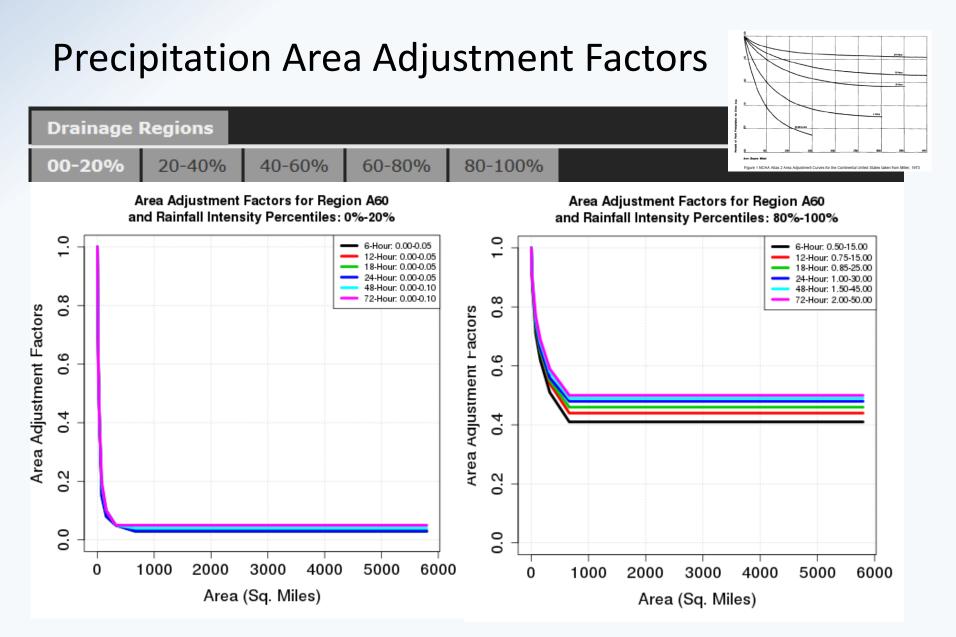

Can S2S forecasts tell us how long a given anomalous condition is likely to persist?

#### **Reservoir Storage Forecast Maps**

Could storm-based forecasts yield improved forecast storage probability maps?

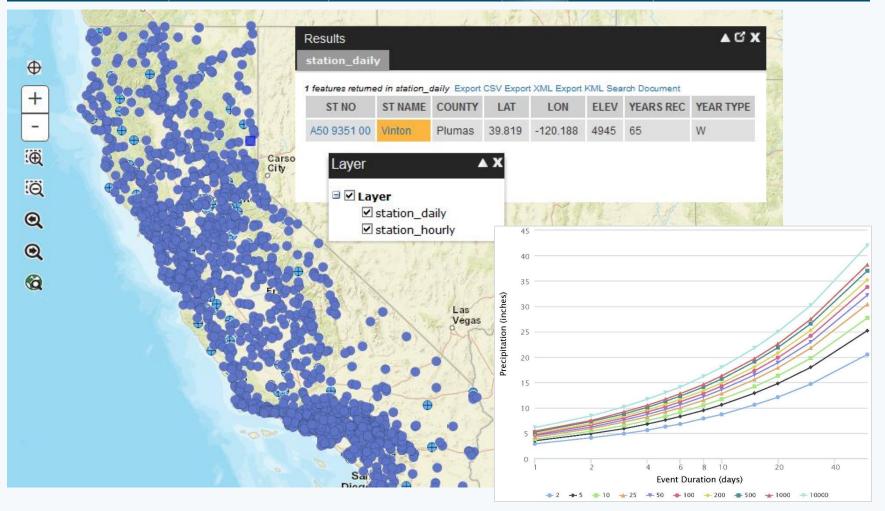

Could storm-derived factors be used to interpret storm forecasts?

## Conclusions

- Select storm characteristics are amplified or suppressed in spatially consistent patterns under the climate phases analyzed.
- The altered storm characteristics could form the basis for generating storm-based forecasts at subseasonal to seasonal time scales.
- Statistically-derived storm impact databases and applications being developed can integrate storm forecasts into existing decision processes.
